To Whom It May Concern:

It is my pleasure to recommend WGM Group to assist with your planning, engineering and surveying projects. I have worked extensively with this firm using all of their disciplines and find them to be very capable, professional and accessible. They do an excellent job of integrating planning and engineering to implement projects on the ground. Our agency has worked with WGM on transportation projects, environmental remediation, downtown streets plans, general land use planning and surveying. They understand community outreach and know how to engage the public when appropriate.

WGM Group's real strength lies with their excellent professional staff and the diversity of the services they offer. The combination of planning and engineering brings a level of creativity that is not found in many engineering firms. Brent Campbell is one of the most creative engineers I have worked with over the course of my career. He has the ability to see the big picture and find creative engineering solutions to bring about the desired product. He has worked with the City of Missoula on contentious projects and has helped us navigate through the controversy to reach a point of consent, if not consensus.

I would highly recommend this firm for any high profile municipal project, particularly if there is significant public involvement or controversy. They have the experience to work with the public and find the solutions that are best for the community as a whole. I will be happy to talk with you relative to the specifics of projects that WGM Group has worked on with the MRA. I can be reached at 406-552-6156 or at ebuchanan@ci.missoula.mt.us.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ellen Buchanan".
