Subject: Letter of Recommendation for WGM Group

To Whom It May Concern:

I would like to take this opportunity to highly recommend the WGM Group. I have worked with WGM on a variety of public projects for over fifteen years as the City of Missoula City Engineer, and current Public Works Director. The City of Missoula has contracted with WGM for civil engineering, surveying, municipal planning and utility projects. I have consistently been impressed by their business organization, and their principles and staff as an outstanding consultant company.

WGM group is both a community-minded company and technically competent. They have demonstrated technical competence through recent sanitary sewer and road construction projects for the City of Missoula. WGM has a background with the city in infrastructure engineering and construction administration. They have also been involved in numerous community master planning ventures. Their broad experience would make them a strong candidate for a variety of civil engineering services.

The WGM staff is easy to work with and shows enthusiasm for a job well done. They are experienced professionals that take pride in their work. I highly recommend WGM group for civil engineering consulting services.

If you have any questions or need additional information, please call me at (406) 552-6353.

Sincerely,

R. Steven King, P.E.  
City of Missoula  
Public Works Director
