

US 93 Whitefish Urban and Whitefish West Project Location and Milepost Limits

The US Highway 93 corridor is split into two projects in the Whitefish area. The work entails: adding City entry treatments; incorporating medians, turn lanes, bike lanes, and sidewalk; replacing two existing bridges; and building two new bridges.

The project defined by the Environmental Impact Statement (EIS) provides improved traffic safety and capacity, while striving to be compatible with the character of Whitefish.

Whitefish West
The Whitefish West project begins on 2nd Street just west of Baker Avenue and follows US Highway 93 to approximately one-half mile west of Twin Bridges Road (Highway 424) at milepost 133.

Whitefish Urban
The Whitefish Urban project begins on US Highway 93 at 13th Street, continues north on Spokane Avenue to 2nd Street, continues west on 2nd Street, and ends just west of Baker Avenue. The project includes a one-way couplet on Spokane and Baker Avenues between 7th and 2nd Streets, and a new bridge crossing the Whitefish River at 7th Street.
